- Automatic cleaning and maintenance programs
- Ideal for high-use workplace environments with 50-150 staff

Krema 360 Series Automatic Coffee Machine

Best for

- Diverse coffee and milk preferences
- Premium shared workplace spaces
- Teams wanting greater drink variety
- Flexible self-service coffee environments
- Organisations wanting the machine to reflect their brand

Built for choice and flexibility

The Krema 360 Series suits workplaces that want greater variety without added complexity. Up to 30 beverage options, dual bean hoppers, and dual fresh milk capacity mean two milk types are available at once — so dietary needs and personal preference are never a trade-off.

The modern design and intuitive touch screen keep self-service smooth in busy shared spaces.

Make it yours

The touch screen and illumination can both be customised to your brand colours, turning the machine into an extension of your workplace identity rather than just another appliance in the break room.

High variety, made simple

From espresso and long black to cappuccino, latte, flat white, magic, hot chocolate and chai, the 360 Series delivers consistent café-style coffee all day. Automatic cleaning and reliable performance keep maintenance low and teams moving.
