

Krema 400P Series

Café Quality Coffee, Any Time

AUTOMATIC COFFEE MACHINE

- European-made, bean-to-cup espresso
- Up to 14 drink selections
- Powdered milk convenience
- Self cleaning system
- Optional ConnectMe® remote monitoring & diagnostics
- Supports up to 150 people per day

Krema 400P Series Automatic Coffee Machine

Built for 24/7 convenience

The Krema 400P Series is designed specifically for environments where fresh milk replenishment and daily cleaning routines can't always be guaranteed. By replacing the standard fresh milk fridge with a third canister for powdered milk, the 400P delivers greater self-sufficiency without sacrificing beverage variety.

Its clean 360° design and illuminated ingredient canisters bring a modern, professional aesthetic to shared spaces, while the intuitive 10.4" touchscreen ensures effortless drink selection.

Engineered for self-efficiency and versatility

Capable of producing over 150 drinks per day, the Krema 400P Series offers up to 14 beverage options, including espresso, cappuccino, latte, and hot chocolate. At its core is the patented CoEx® brewing system, supporting both espresso and regular coffee preferences with precision.

The flexible ingredient layout allows for up to two bean hoppers and additional canisters for powdered milk and chocolate. With no fresh milk system to manage, the machine simplifies maintenance with a fully automated cleaning system and a front-access waste bin.

Optional ConnectMe® technology enables remote monitoring and diagnostics, making the 400P ideal for venues requiring minimal supervision and around-the-clock access.

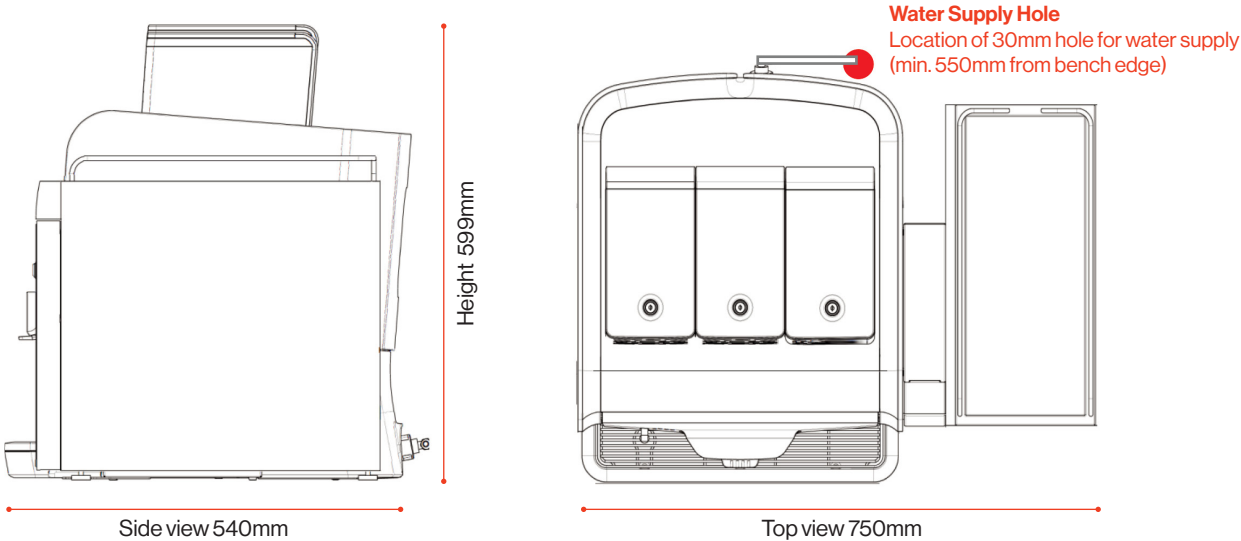

Specifications

Dimensions (w x h x d)	750 x 599 x 540mm (Recommended to allow 50mm on all sides for cleaning & filling)
Weight	35kg
Colour	Black
Power Supply	240V
