- Three drink options – chilled sparkling, chilled still, and ambient
- Totality® Filtration system with built-in hygiene assurance
- Mains-connected for continuous supply; simple installation
- Choice of freestanding or countertop models
- Supports up to 150 staff per day

Krema E6 Series Filtered Water Dispensers

Sustainable hydration, redefined

The Krema E6 Water Dispenser delivers sparkling, filtered hydration without the complexity or cost of underbench tap systems. Its modern, compact design suits today's workspaces, while EcoMode and DryChill® technology ensure energy-efficient, hygienic cooling. A sleek antimicrobial touch panel makes daily use easy and safe – even in high-traffic areas. Available in both on-bench and freestanding formats, the E6 fits effortlessly into any workplace layout.

Versatile performance with intelligent features

Powered by the ProCore® modular system, the E6 dispenses chilled sparkling, chilled still, and ambient water with precision and ease. Optional upgrades – including Viovandt® LED-UV purification and SensorBeam® touchless control – enhance hygiene and user experience. SIMSecure® digital connectivity enables remote monitoring and diagnostics, ensuring long-term reliability with minimal hands-on maintenance.

Specifications
