

At Crema, we are committed to responsible sourcing from crop to cup — and through every machine and process in between. As a premium workplace refreshments provider, we uphold high standards in environmental sustainability, ethical sourcing, and modern slavery risk management.

Coffee: Ethical & Transparent from Farm to Cup

Crema partners with Australian roasters who share our commitment to quality, ethics, and the environment.

Zest Specialty Coffee Roasters

- Traceable supply chains across Brazil, Colombia, and Peru.
- Fair pricing models supporting smallholder farmers and community development.
- Actively managing supply chain risks to prevent forced or exploitative labour, following recognised modern slavery guidelines.
- Sustainable operations including solar power, rainwater harvesting, and compostable packaging.

Evolve North Coffee

- Ethically sourced beans roasted in solar-powered Australian facilities.
- Sustainable practices embedded in roasting, packaging, and operations.
- Practices align with Crema's standards for environmental responsibility and ethical sourcing.

Coffee Machines: Sustainable Innovation by De Jong DUKE

- EcoVadis Gold Medal 2024 for environmental and social governance.
- Carbon-neutral production powered by solar and wind energy, with emissions offset via conservation projects.
- Ethical labour practices and focus on employee wellbeing.

Our Promise

Crema delivers more than coffee and equipment — we deliver a values-driven partnership. Full transparency, ethical sourcing, and environmentally responsible practices are embedded across our supply chain, ensuring our partners' sustainability goals are met.
