How KremaAnywhere works
Four steps, ensuring coffee continuity for regional sites

Check
Customer checklist confirms site suitability for coffee machine.

STEP 1

Dispatch
Pre-commissioned machine is delivered directly to site.

STEP 2

Setup
Customer completes setup using guided video tutorial.

STEP 3

Support
Phone assistance and fast replacement, whenever needed.

STEP 4

Krema 340 Series Automatic Coffee Machine
Café-quality, wherever you are

The Krema 340 Series brings genuine café-quality coffee to regional workplaces – bean-to-cup espresso, up to 20 beverage options, and an intuitive HD touch-screen your team can use from day one. A time-saving self-cleaning cycle and integrated fresh milk fridge keep upkeep to a minimum, all in a compact design that serves up to 50 staff a day. A statement piece for any break room or executive space.

- Bean-to-cup coffee system
- 10" HD touchscreen with intuitive interface
- 20+ beverage selections
- Integrated milk system with fridge
- Automatic cleaning and maintenance programs
- Supports up to 80–100 cups per day

Premium coffee blends for every palate
Ethically and sustainably sourced

Essence Blend
Smooth, nutty and easy-drinking for everday moments.

Intensity Blend
Bold, rich and full-bodied with a strong finish.

Synergy Blend
Balanced with subtle citrus brightness.

Clarity Blend
Clean espresso flavour with caramel notes.

KremaAnywhere FAQs

Does Krema service businesses outside the capital cities?

Yes. For the bigger regional cities including Newcastle, Geelong, Hobart, Darwin and Gold Coast, Krema delivers the same fully managed workplace coffee service enjoyed by the major cities.

For smaller regional cities (e.g Goulburn or Albury/Wodonga), Krema offers **KremaAnywhere** – the same premium equipment and ethically sourced blends, with remote-first support that ensures great coffee and service continuity. Perfect for organisations with city and regional offices looking to consolidate their coffee service with one trusted national supplier.

How is KremaAnywhere different from Krema's standard metro service?

CBD and metro sites are supported by the full KremaCare service package that includes professional installation, regular machine servicing, and rapid response callouts should anything go wrong.

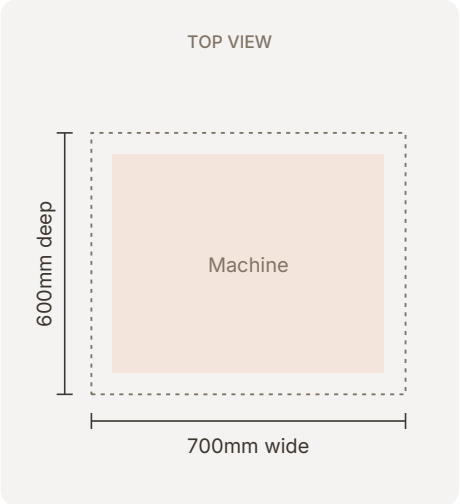

Regional and remote sites are supported through **KremaAnywhere** – pre-tested equipment, guided setup, and remote phone support – eliminating the dependence on physical callouts, whilst maintaining a high level of coffee quality and machine reliability.

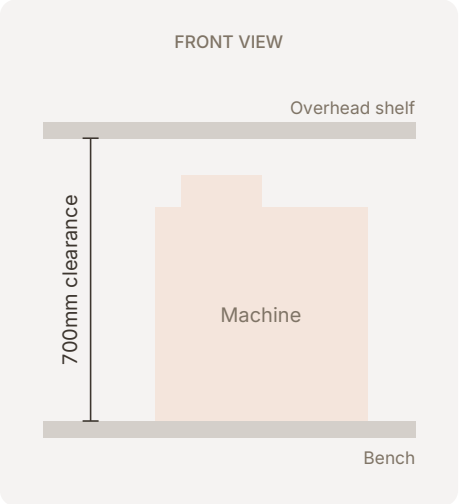

What happens if something goes wrong with a regional machine?

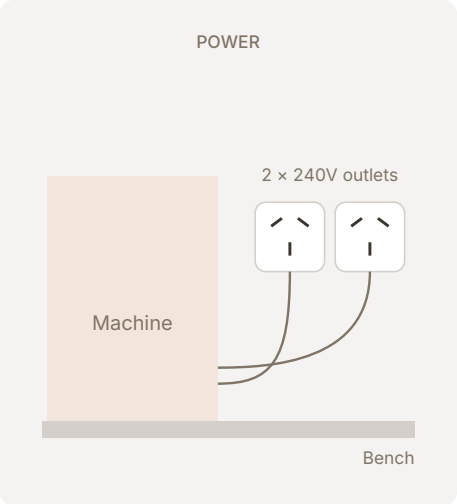

Every machine comes with a QR code linking to easy-to-follow troubleshooting videos on the Krema YouTube channel. If that doesn't resolve it, Krema's team provides remote phone assistance to fix issues quickly. And if an issue can't be resolved remotely, a simple swap-n-go replacement machine is sent out – so your team is never left without coffee.

Is your regional workplace ready for a Krema coffee machine?

Before we ship your Krema 340 Series, check your site meets these three requirements.

☐ **1 Bench space**
700mm (W) × 600mm (D) of clear bench

☐ **2 Overhead clearance**
700mm from benchtop to underside of shelving

☐ **3 Power**
2 × 240V outlets within cord reach

Confirm your site is ready

Tick the three boxes above, complete your details and sign below. This means your machine can be installed smoothly with no returns. If the machine doesn't fit or power isn't available, it will need to be returned to Krema at your cost.

Return this form to **enquiries@krema.com.au** or your Krema Account Manager.
